

Seminars of NCBJ-ICH TJ Graduate School – Chemistry, summer semester
(online zoom platforms)

19.05.2021 godz. 10.00.

Mgr Emilia Górczyńska,

"Gold nanoparticles labeled with $^{197/197m}\text{Hg}$ radionuclides as precursors for the production of radiopharmaceuticals".

Supervisor dr Agnieszka Majkowska.

26.05.2021 godz. 10.00.

Mgr Wojciech Dudek,

"The magnetic aromaticity in the cation radicals of monosubstituted benzenes".

Supervisor prof. Jan Czesław Dobrowolski.

02.06.2021 godz. 10.00.

Mgr Sahar Nostrati

"Potential radiopharmaceuticals labeled with ^{227}Th or ^{135}La for targeted α therapy (TAT) or Auger electron therapy (AET)"

Supervisor dr hab. Marek Pruszyński, prof. IChTJ

09.06.2021 godz. 10.00.

Mgr Stephen Kabasa

"Computer simulation of CF_2Cl_2 degradation in air under electron beam irradiation "

Supervisor dr hab. Yongxia Sun, prof. IChTJ

16.06.2021 godz. 10.00.

Mgr Nelson Kiprono Rotich

"Studies on the hydrometallurgical recovery of titanium dioxide (TiO_2) from the titanium mining industry using nuclear techniques"

Supervisor prof. Andrzej Chmielewski
